# HYPR

# Fortune 50 Healthcare Corporation Seamlessly Deploys Passkeys

## 1,000,000+
Passkey Users Deployed in 6 weeks

## Key Results

- Quickly built passkey support into proprietary app with HYPR FIDO2 API and server
- Provided customers easy and secure login
- Met all milestones to date for passkeys rollout
- Deployed scalable, secure passkeys for optimal customer adoption, which can be managed on an enterprise level

## Overview

With the clear and growing interest in passkeys, the executive leadership at this top U.S. healthcare corporation resolved to be one of the first to support passkeys login for their users. This would help cement their position as an organization that is secure, innovative and enables customer choice.

## The Move to Passkeys

Already familiar with HYPR as the leader in FIDO passwordless MFA, the healthcare organization knew just who to approach for their passkeys initiative.

- The company worked with HYPR to strategically map out a plan to migrate 10 million+ users to passkeys, using a scaled deployment approach.
- The company began passkeys deployment in April 2023.
- Ten weeks later, they had already deployed **1,000,000 passkeys**.

## Ingredients for Passkey Deployment Success

The company was able to deploy rapidly while fulfilling its business and security requirements by ensuring these core principles:

**Security:** HYPR's FIDO2 Certified server and passkeys management capabilities allowed the company to stand up its passkeys infrastructure quickly and securely.

**Flexibility:** The company easily incorporated the HYPR FIDO2 API into its proprietary customer app.

**Scalability:** With HYPR's proven track record and expertise in passkeys, the company knew it could handle the customer migration and rapid expansion to tens of millions of users.

**Unsurpassed User Experience:** Passkeys deployed through HYPR ensure a fast, seamless digital experience.
